Suitable foods for your bunnies!

GREEN LIGHT: 2 cups per day per bunny

Broccoli & Beetroot Leaves, Bok Choy, Brussel sprouts (peeling, stems, leaves), Cauliflower leaves, Celery, Chicory, Chinese cabbage (Wombok), Fennel, Kale, Leeks, Radicchio, Rocket, Romaine (cos) lettuce, Spinach, Salad mix (from the supermarket), Watercress, Carrot tops, Leaves and branches from fruit trees, Pea plants (not peas), Strawberry, blackberry, raspberry leaves, Sunflower leaves, Sweetcorn plants (not corn itself), tops from celeriac, artichokes, radish leaves, or other root veg tops, Rose leaves & petals (as long as not treated). Herbs can include, Basil, Chervil, Comfrey, Coriander, Fennel, Parsley, Rosemary, Sage, Tarragon, Thyme.

CAUTIONARY: Small amounts only as they can be fattening

Apples, Artichokes, Bananas, Beetroot, Carrots, Celeriac, Parsnips, Pears Swede, Peaches, Apricot, Grapes, Strawberry, Blackberry, Raspberry etc.

RED light foods (please don't give these foods to your bunny)

ICEBERG LETTUCE: Can cause diarrhoea in bunnies which can be fatal

CAULIFLOWER FLORETTES: Some bunnies can develop bloat which can lead to Gut Stasis.

Cauli leaves & stems are ok

BROCCOLI FLORETTES: Some bunnies can develop bloat which can lead to Gut Stasis. Again Broccoli stems & leaves are fine

CABBAGE LEAVES: Some bunnies can develop bloat which can lead to Gut Stasis

TOXIC PLANTS IN YOUR GARDEN:

Daffodils & bluebell bulbs etc are toxic, as are Foxgloves but 99% of bunnies won't touch these sorts of plants unless there is NOTHING else to eat, The UK fields are full of these plants but there are still millions (well heaps anyway!) of wild buns over there!

- **Gut stasis is a life threatening medical emergency. Please take your bunny to your bunny savvy vet if your bunny stops eating.**
